### Understanding cables

Every cable message consists of three parts:

- The top box shows each cables unique reference number, when and by whom it originally was sent, and what its initial classification was.
- The middle box contains the header information that is associated with the cable. It includes information about the receiver(s) as well as a general subject.
- The bottom box presents the body of the cable. The opening can contain a more specific subject, references to other cables (browse by origin to find them) or additional comment. This is followed by the main contents of the cable: a summary, a collection of specific topics and a comment section.

To understand the justification used for the classification of each cable, please use this WikiSource article as reference.

¶1. (C) Croatia's Financial Intelligence Unit (FIU) froze an account of two 1267 designated individuals on May 2, 2006. The account owner was Wael Hamza Julaidan and the co-signer Chafiq Ayadi. According to information shared by the FIU, this account was opened in 1992 and was used through the end of 1993. There have been no transactions on the account since that time, other than interest accrual and account fees. The FIU picked up the account on Ayadi's name as the

co-signer. The spelling provided for Julaidan was a slightly different variant, Wael Hamzah A. Jelaidan.

¶2. (C) Comment: The FIU in Croatia relies on its cooperation with the commercial banks. Our contacts characterized this as an old account that was missed in previous vetting and were quick to point out that it contained a small sum and had not been active even at the time of the designation of its holders. Nevertheless, this points up the difficulties the FIU faces. Its small staff contains very few people with the specialized knowledge required for the work it does. This situation is exacerbated by a high attrition rate, as government salaries in Croatia are simply not competitive with the private sector, particularly in finance. End Comment.
